

# the GROWING INNOVATION series

The Growing Innovation Series is aimed at Agrifood business on the Coffs Coast and follows on from the successful 2014 Mid North Coast Food Forum. It provides insights into the areas identified by industry as being of key interest and opportunities for networking and collaboration.

**Be you a chef, farmer, distributor or value adder these workshops are for you!**

To launch the series Food Innovation Australia will be presenting a **FREE** introductory workshop.

## Food Futures - Growing Success Collaboratively

This workshop is the first step towards creating a food industry cluster to provide support and collaboration to achieve real outcomes for the food industry in our region.

The forum will provide an opportunity for small and medium sized producers to explore innovation; what it means to their business and how it can help them collaborate and identify opportunities to exploit new markets.

Workshop participants will have first-hand access to organisations such as Food Innovation Australia, whose mission it is to improve the food industry's productivity, profitability and
